by B Duan 2021 Cited by 5 Xenome: a database of xenogeneic silencer in plants. Open in new tabDownload slide. Abstract. The association between plant xenogeneic silencer and the endogenous retrotransposons is well documented. However, little is known about the distribution of such silencers in . Xenome: a database of xenogeneic silencer in plants. Open in new tabDownload slide. by H Wu 2022 Cited by 8 Gene regulatory networks and mechanisms controlling endosymbiosis. The symbiotic state is characterized by horizontal transfer of genes from a free-living prokaryote to a eukaryote through an endosymbiotic . Gene regulatory networks and mechanisms controlling endosymbiosis. The symbiotic state is characterized by horizontal transfer of genes from a free-living prokaryote to a eukaryote through an endosymbiotic . by S Upadhyay 2022 Cited by 5 Molecular mechanisms underlying syngamy in unicellular sexual systems. In many unicellular sexual systems, a mature meiosis is followed by syngamy . Molecular mechanisms underlying syngamy in unicellular sexual systems. In many unicellular sexual systems, a mature meiosis is followed by syngamy . by U Laskowski 2022 Cited by 5 Molecular and genetic analyses of a Wolbachia-induced parthenogenesis in a spider. Open in new tabDownload slide. This book describes the driving forces behind the evolutionary process at the molecular and genome levels, the effects of the various molecular mechanisms . by B Efron 2023 Cited by 6 Evolution of . by Y-D Cheng 2024 Cited by 5 Geraniol acetate modulates allelopathic interactions between maize seedlings and . by A Nagaraj 2024 Cited by 10 This study demonstrates that a polygalacturonase-inhibiting protein from wheat (TaPGIP) is located in the cell wall of the endosymbiont, supporting a direct effect of PGIP on root nodule growth, and is independent of a direct effect of PGIP on . by A Natarajan 2024 Cited by 5 2d92ce491b
