A: It is a standard Chemistry textbook in my Uni. It is really on topic for the site. Chemistry Manual 3rd edition by John D. Smith, Henry H. Workman Chemistry Consulted by E.P.Vogt Chemical Laboratories Standardized Methods of Laboratory Analysis by David A. Carroll, David M. McClure Chemistry of Life Processes, Third Edition, by John D. Smith Q: Multiple filters in a single query for Datagridview I am working on WPF Datagrid. I have a column named as test. In that column if the user enters any string it has to be filtered out. If I use StringContains I can find out the exact case, but I need to get all strings containing test. I have written the following code for that: `DataTable dt = new DataTable(); dt.TableName = "UserSelection"; dt.Columns.Add("test"); dt.Columns.Add("Status"); DataRow row = dt.NewRow(); row["test"] = "testing"; row["Status"] = "Blank"; dt.Rows.Add(row); dt.Rows.Add(row); dt.Rows.Add(row); string test1 = "testing123";`
