Category:Autodesk products Category:Computer-aided design softwareQ: Get the most recent stored record
What is the best way to get the last record added to a table? I want to get it back with maximum id. A: Use a
subquery with LAG() (LEAD() doesn't work in SQL Server) SELECT id, value FROM tab WHERE id =
(SELECT MAX(id) FROM tab) AND value = 'whatever' LIMIT 1 Q: What does "There will be a sitting
strike committee" mean? I've heard this phrase, but I have no idea what it means. A: It means the
management will impose a short-term, often temporary, work stoppage in the hopes that it will inspire
employee buy-in and leadership renewal, and if a better offer comes along, they might reverse the move.
Edit: It's like a mini "sit-down" strike, if a company's senior management realize that without solid leadership
from the top, their employees will not trust them, and will likely revolt. A: It means that management is going
to tell their employees to shut down production until they get their way. This is a way of appealing to the
employees' sense of "fairness" as much as it is a way of intimidating them. Management wants to get the
employees to agree that they have done all they can, and since they feel like their best option is to turn things
around, they are going to wait it out. This forces the employees to waste time for no reason and get punished
if they try to do any actual work. { "name": "ISSU.IE", "main": "", "version": "0.1.2", "private": true,
