Does anybody know where to get Syswin 64 bit and will Omron support the 64 bit version of Syswin? Verified: Oct 21, 2010
Call Omron for the correct product. You can verify that product here. Reply. Jan 21, 2011 WXP 10.4-32 and Win 7 32Bit are installed? I use Win XP, and the one from Omron is a 32 bit version Reply. Sep 5, 2011 I have an Omron Win XP version 10.4-32. I just called and verified what is the exact product I have. Syswin 10.4-32. Reply. Feb 25, 2014 I have tried every version of Syswin. I have just been searching for a simple program to send CTL signals to my 4-relays. They are all wired in series. So I simply want to have them wired as follows: 4 wires to 4-channels CTLs. I would like to have a button, push it down and it would just send the CTL for the circuit connected to the relay. So I am not really concerned with sending code. Also I need to be able to send other signals to the relays, so I need a program that can send those as well. I am rather looking for a function, in a program. One that will output the signal, send it to a relay and say it has been sent. I do not need a simple function, I need something that has all that, but easy to use. Reply. Jun 9, 2015 I have a 12.5hp Singan pump and would like to drive it with a SYSWIN-E. I have Omron rep say that the E-version is not available for Windows 7 32 bit. Reply. Sep 9, 2015 Windows 7 Ultimate 64-bit, SYSWIN-E-V4.1 Syswin software, 2008-9 Product/Version/Support per Online manual. No 64 bit support. Explain what you need to run SYSWIN. Sep 10, 2015 You could try to download the program and run it with a different version. You can check what the program actually does here. It is a very simple program with a list of commands. Some of the commands are used to control the devices. One command is used to toggle the led. Reply. Sep 19, 2015 You can download the program from
