She talked about the project and her new book, 10% Body Fat, during an exclusive chat with Sophie Raworth and Dr Colin Espie at Sport Relief yesterday. The much-loved WWE superstar is best known as one of the greatest wrestlers of all time and won the WWE Women's Championship twice. She retired in 2006 after winning her record-breaking 15th women's championship, but now devotes herself to spreading the word about fitness and staying in shape. Trish Stratus talks about her passion for fitness at an exclusive chat with Sophie Raworth and Dr Colin Espie at Sport Relief on Channel 4 yesterday (18 April) On the programme, she gives an interview on her fitness regime, weight loss, family, and her new book, 10% Body Fat. Dr Espie, author of the book Zero Belly Fat, talks to Trish about how her lifestyle changed after being diagnosed with fibromyalgia and degenerative disc disease. Watch the interview with Trish Stratus on The Global Sports Energy Project: You can watch the whole interview on The Global Sports Energy Project on Channel 4 from 21:00 on Thursday 19 April on Channel 4. This is the first part of the interview with Trish Stratus. RMI is reduced. Then, what is to be done with the core portion of the paper? If RMI is to be reduced, then the problem of compacting the core portion is very similar to the problem of compacting the entire paper because most of the material that needs to be reduced in the paper has already been compacted in the "paper making zone" which is the entry point for the fiber material into the paper making zone. As was indicated earlier, when RMI is reduced, this means that at least a portion of the core portion of the paper is being compacted more effectively at a reduced velocity. In addition to compaction, the paper web may be subject to drying. One of the problems with conventional systems is that the web is usually dried from only one side of the web and there is little consideration for evenly drying the web. It has been found that more even drying is obtained if the web is supported and dried from both sides. In 2d92cc491b
