How to determine the cost of work services How to analyze the cost of production. Methods for analyzing the cost of production. Analytical study of the cost of production. Methods of carrying out the analysis of the cost of production. Features of the analysis of the cost of production. The study of the cost of production is necessary to determine the impact on the cost of production of reducing prices, increasing productivity, the introduction of organizational and technical measures. Input data for the analysis of the cost of production: 1) calculations of the cost of production (Table 2); 2) plan of labor and labor compensation fund (Tab. 1); 3) reporting costing of the cost of goods (Tables 3, 4); Table 1. Labor plan and labor remuneration fund 4) standard data on labour and wages (tab. 5). Table 2 Calculation of the cost of production 5) Report on the cost of production (Tab. 6) Table 4. Calculation of production cost 6) Production costs and the cost of production to be allocated (Table 7). 7) costs of main production. 8) costs of selling products. According to the degree of homogeneity of costs, the following types of calculations are distinguished: 1) estimated calculations. The cost estimate is made for the product. 2) Technological calculations. Technological calculations are made for a product or operation. 3) Manufacturing calculations. The manufacturing calculator is composed on the product or group of homogeneous products According to the coverage of costs, all calculations are divided into: - production; - complete; - reduced; - production costs of the enterprise; - estimated (budgetary) calculations. Production calculations are made for a finished product or unit of production. Full calculations are made on the product, consisting of several units of production. Abbreviated calculations - for a product consisting of one or more parts that can be sold as independent products. Full calculations are made by cost items. fffad4f19a
