**Solucionario De Probabilidad E Inferencia Estadística Rufino Moya Y Gregorio 398 haydkaml**

It's quite a well balanced one, considering that I've been trying to do something on my own and not in combination with other projects, but hey, it takes time to get this thing off the ground, no? & of course, it was Rufino's previous project that convinced me to do this one. I didn't expect to get any money out of it, nor did I expect it to earn as much as it did. I guess it's all due to me being rather motivated to get this out there; even though I would've been happy enough with what I already have at this point. Or maybe it's because I'm old & wise enough to know when I need to slow down a bit (and look for new ideas). But anyway, the point is, Rufino's project is finished, so this pot is now ours! & this is a project that I'm going to try to do something similar, as well as provide a platform for other people to get in touch with me. We'll see how far I get with that one. I'm happy to already be done with this one, as I'm starting to feel that I'm kind of exhausted at this point. Also, I'm going to have to figure out which angle I should take for the next project, as I don't want to keep repeating myself too much. I'm going to be expanding on this one as much as I can, but I'm also going to try to get in touch with other people. I've already got contacts with an Algorithms course, but I still need a data structure course (and maybe I should also expand the one I have), as well as a compiler one (of course, the latter is something that I really want to do in order to complete the programming side of this project). But anyway, I'll try to do as much as I can, so if you have any suggestions, send them my way! & as for the pot, it is pretty well balanced, as I wanted it to be. This will be my first "pro-tip" money pot. I already had to give up the practice of giving away as much as I earn (almost 100%, in case you're wondering), so this should go without saying that this pot is intended as a way to support myself. But I still have a goal of earning enough to buy my own house someday. However, as I've mentioned, my plans of buying a house are kind of short term
