QuickTone is the most straightforward way to upload your music and ring

#### What's New in the?

QuickTone is an easy and painless way to get your iPhone to ring and/or vibrate! No more iTunes; No more manual ringtone changes; No more syncing with one of your PC's libraries Why choose QuickTone: You don't need to use iTunes or a PC to do this Your phone can be anywhere; the app will work with any Wi-Fi connection You don't need to do any conversions - your iPhone accepts any media file type! Edit ringtones / SMS tones in any way you like Type conversions, renaming, silence, pitch, volume, time shifting, pitch shifting... You can use it with any WiFi connection You don't need to sync anything, and you can use your iPhone just like it was on your PC No iTunes, no syncing with one of your PC's libraries, no more manual ringtone changes... Why are we doing this? The App Store is a free service that provides most of what we do here. If you want to subscribe to the App Store for your iPhone, iPod touch or iPad, you can use iTunes (you can download the free version) or use some other PC or Mac to sync your purchases and manage your library. The App Store is even more complicated than using iTunes, because there are so many different types of content. You have to spend time downloading and figuring out how to get things done. It's a slow process. QuickTone does it all for you. It takes care of everything, and you can use your iPhone just like it was on your PC. You'll have to do some things, like selecting your iPhone's ringtone, but the rest of it will be done automatically. If you want to see QuickTone in action, check out this video: Settings QuickTone's settings page has many features to help you do everything you want to do with your iPhone. Ringtone Edit: This is where you change your iPhone's ringtone. The media file you choose will be converted to a wave file. It's a real audio file, so if you want to convert your MP3 file to ringtones, this is the place to do it. SMS Tone Edit: Here you can edit your SMS tones. You can change the SMS tone that pops up when you receive a message. Or if you want a specific tone for each of your SMS messages, you can do that here. You can also change the ringtone that you hear when someone else sends you a message. You can use this page to edit the text color of your SMS tone, as well as to edit the text color of your ringtone (if you want to). Conversion This page is where you can convert any of your media files to
