* Share notes via e-mail, Twitter, and Facebook * Sync notes across your devices * Keep task lists private * Use the Task List widget to save time GumNotes Serial Key Features: * Share notes via e-mail, Twitter, and Facebook * Sync notes across your devices * Keep task lists private * Use the Task List widget to save time GumNotes is a professional application designed to enable you to manage your tasks easily. You can share notes to friends and co-workers over the Internet. Get GumNotes and take it for a spin to see what it can actually do for you! Why a API? Use your API product to build apps and integrate your product with other apps. Create a toolkit that your developers can use to build applications. Create one-stop dashboard or better integration between in-house apps. Fully Managed API API to help you integrate your app with the system, data flow, and business logic. No programming! No API application development required. You get an API that can be used by you and your developers, with just one vendor. Products Sparx Systems delivers more than 50 products that cover all the bases that you need to develop any kind of application for real time and browser-based applications, to business applications, to web-based applications and to API. Our Sparx Systems APIs technology is a fusion of hardware and software, designed to solve the technical challenges of the mobile, social and web applications. Our cloud-based APIs provide a one stop solution to all business applications, web-based or mobile applications. Our API solutions are based on the open source technologies, which makes Sparx Systems' applications completely open source (open-core), once the initial development and cloud deployment stage are done, the APIs can be used by anyone or any company, making them cost effective. Sparx Systems offers APIs with both developer and supplier model. Sparx Systems has been designed for ease of use, with APIs that are intuitive, and customer support that is best in the industry.
