Audio Expander is an audio software application designed especially for enhancing your audio recordings. The software allows you to increase or decrease the volume of the selected track in your audio files, up to a level of 200%, while avoiding amplifying distortions. The application also provides the possibility to apply a frequency filter effect, thus allowing you to boost the audio volume for selected tracks, or dampen the sound for the rest. Furthermore, you can specify the recording mode, thus enabling manual or automatic recording of the different tracks, and set up the encoding parameters. What's more, audio expander allows you to split the audio file in different parts, with the possibility to identify them by name, and encode them as separate tracks in real time. The tool offers basic export options as well, thus letting you save the processed audio file as M4A, MP3, AMR, or OGG file format. Other notable features are represented by the ability to set up predefined audio files as ready-to-use tracks, and to generate a report of the recording process for additional information. Audio Expander definitely makes audio recordings sound better and easier to manage. The user-friendly interface and useful functionality of the software offer all of us a chance to save time and effort when making audio recordings.

Audio Expander Description: Siren SCAN is a simple tool designed for speech-to-text conversion. The software is designed to facilitate speech recognition when performing online searches via a search engine. It does this by silently scanning audio from online radio stations, live chats, and support sessions for keywords and phrases. According to the actual search criteria, the tool automatically extracts the audio, converts it into text, and places it into the text box of the

main window. Siren SCAN is capable of analyzing the keywords and phrases found within the audio stream, thus resulting in accurate transcriptions. What's more, you can define the keyword search mode (Google, Bing, or Live), and the performance level of the software (normal, fast, or slow). When it comes to exporting options, you can save the audio transcripts to TXT, CSV, HTML, XML, or any other type of formatted file. The program also allows you to export the target file in .txt, .html, .xml, or .csv format. Other noteworthy features consist of the ability to set up the text size, the highlight color, the paper color, and the
