Aligning a frame A _frame_ is a border or edge around an image. In print production, frame edges are meant to clearly define and frame a specific area of an image — just like on the pages of a book or magazine. You should always frame your image with a black or white border so that it fits correctly on the page and is always square. Most framers print images at 100 percent on the page. That is, they print the entire image or at least the entire area that is a border. Frames usually run only ½ to 1 inch wider than the edge of the image, so you need to make sure you leave enough margin to get it placed on a page. Check the recommendations for the type of paper and paper stock you'll be using and follow those guidelines. Sometimes margins are included in the price of the paper stock. Even if you
