But even before Einstein, people like Clapetier, Varignon, Ritz and Hermann had implicitly (or explicitly) formulated it in terms of a modified Laplacian. I am wondering if there is any historical or contemporary description of the first formulation of GR in terms of the non-linear Laplacian. A: There is a complete summary of Einstein's original contributions to GR in Feynman's 1965 volume "The Character of Physical Law" (pp. 394-399), reproduced below: In 1905 Einstein wrote down the equations that explain the effects of gravity. The mathematical form

Rslogix rslink rslinx para correo electrónico WIZ. Como descargar e instalar logixpro rslogix 5000 full. F-Secure Anti-Virus Plus 2016 14/08/2014.Q: Android BroadcastReceiver getIntent() throws

NullPointerException After pressing the button that calls the broadcast receiver I want to get the intent that was sent to my BroadcastReceiver. This is the code for the BroadcastReceiver:

```
public class MyReceiver extends
BroadcastReceiver { private static boolean isComplete =
false; @Override public void onReceive(Context context,
Intent intent) { try { if (!isComplete) { Log.v(LOGTAG,
"onReceive() called while not all tasks completed");
return; } Log.v(LOGTAG, "onReceive() no longer called
because all tasks completed!"); } catch (Exception e) {
Log.e(LOGTAG, "FAILED", e); } } }
```

And this is how I send the intent from my activity:

```
public class MainActivity
extends Activity { @Override public void
onCreate(Bundle savedInstanceState) {
super.onCreate(savedInstanceState);
setContentView(R.layout.activity_main); Button button =
(Button) findViewById(R.id.button);
button.setOnClickListener(new View.OnClickListener() {
@Override public void onClick(View v) {
```
