slender the eight pages is a very short game. it only takes around 45-60 minutes to complete. this is a very quick game with not much to keep the player interested. there is barely any story at all, and all the game does is get the player to collect pages and save them. you will do a lot of clicking and moving, and barely any problem solving, and the game will just keep going for the whole time. slender man is a creepy character created by stephen king, who is the perfect figure to both embody our fear of the unknown and then become the cause of it. i've wanted to play this game since it was announced, and that's something that seems to have slipped away a lot lately. i have a feeling that i'm not going to be able to play this for a while. slenderman is back to haunt you. his fingers are reaching out towards your very soul, desperate to possess your mind. and it's all in your hands, to collect the pages scattered around the forest, and it's all you can do to keep him from getting to them. the game uses a limited life system, in which the player collects pages and the effects of the pages will be used to power the game. if no pages are collected in a certain amount of time (estimated at 2 minutes or so), slender man will start searching for you. slender man moves by teleporting, creeping around the player, but only from a certain distance. as the player collects pages, the fog in the forest grows thicker, and slender man appears closer to the player's character, though the character's sprinting speed slowly increases as well. the slender man is one of the many monsters featured in the game, and will appear as either normal or mutated versions of the character, and can be shot with a gun. he will always appear in a different location, and the player can only see him for a certain amount of time. he is also able to see the player in the dark. other monsters include spiders, and ghosts who will follow the player, and are able to be shot as well. 5ec8ef588b
